

21st Century Baseball

By Gordon and Bernice Korman

Baseball is a boring sport the way it's always played.
But what if we replace the ball with, say, a hand grenade?

There'd be no lollygagging then, the game would not be slow.
A routine fly is not routine because the ball might blow.

The new revolving pitcher's mound would help speed up the pace.
The pitcher doesn't throw in time? The ball goes to third base!

The bull pen houses angry bulls, the warning track is mined,
The umpires are all ninjas, so you shouldn't call them blind.

There are some special batting pants, they're lined with
firecrackers.
That superstar should really earn his seven million smackers!

Oh, we'll still call it baseball. I wouldn't change the name.
But with these small adjustments it's a more exciting game.
