Worksheet for Company Costs

Objective: Determine the cost of your product or service **SERVICE HARDCOPY**

Company Name _____

First Answer the question on the red lines below, then return and continue

Consumable units:	# per unit	# needed per job	units needed per week	Cost per unit	Total Cost **each week**	Cost Per Job:
Total						

Capital Resources:	Cost	Number	Ext. Amount
Total			

Human Resources:	Hrs / Day	Hourly Wage	Hours per Job	Daily Wage	Days p/wk	Weekly Wage
Total						

Startup Cost: Consumables + Capital Resources / first day

How long will your consumables last before you run out?

How long will your capital resources last before you must replace them?

Setting Your Price:

How many weeks will you run your business? (Summer job)		weeks
Trial Price: Must allow you to at least break even		
Guess how many jobs you will do each day		
How many hours will your business be open each day?		
How many days will you work each week?		
How many hours does it take to do 1 job?		

Return to Top

Would YOU pay this price for this job?

The more jobs you do, the lower the **WPJ**

	Total Cost per job	Consumables per job	**W**ages **P**er **Job**
Operating Costs			
Profits	Prof. per job	Daily Profit	Weekly Profit

Weekly Profit	
Total Profits	
Capital Resources	

Subtract your Capital Resource Total

Your profit for the summer
